

## INTERNATIONAL URBAN COOPERATION (IUC) PROGRAMME WEBINAR SERIES

# PLANNING A SUSTAINABLE CITY THROUGH SMART & INCLUSIVE MOBILITY

26 JUNE 2018

4 PM TO 5:30 PM CEST

One of the greatest challenges we face today lies in mobility. Sustainable urban mobility requires a mind shift: where transport in private cars and trucking give way to different modes of public transport: like bicycle and pedestrian lanes, electric vehicles, car sharing and rail freight.

More and more cities around the world are rising to the challenge. Creating solutions that ensure the vital flow of people, goods and services. While mitigating climate change and creating healthier cities with better air quality and more inclusive development.

### AGENDA

16:00 – 16:15	<b>Welcome and introduction: IUC in a nutshell</b> – <i>George Stiff, IUC Coordination Unit</i>
